

Debate Writing For Class 9

Online Smart Classes Are The Future Of Education Style

Good morning, ladies and gentlemen! My topic for the day is "Online Classes are the Future of Education Style" and I choose to speak against the motion.

Online learning or e-learning refers to learning conducted via electronic media, typically on the Internet. There is no face-to-face interaction between the teacher and the student. It decreases the scope of adjusting and modifying the language or the concept according to various audiences. Moreover, humans are known to be social animals and are thus, more interested in direct tuition than virtual tuition. There is lack of proper guidance and self-assessment mechanisms. Not only this, it would also reduce employment among teachers.

Since it involves only brain work and not physical work, they tend to get lethargic resulting in altered physiology. Also, it leads to lack of discipline. Attending a school makes one have a time schedule in a day. This helps them learn some good habits like, bathing, breakfast, going to bed at the right time etc. Physical school help children adopt a discipline.

Not to forget the excellent interactions involved in physical learning. People tend to make friends who support them and mentors who guide them. Thus, no matter how fast technological developments are taking place, the traditional way of learning should not be displaced.

Thank you.
